**Chemistry • Biochemistry • Molecular Biology**

## editor

James Crabbe

Professor of Biochemistry, University of Reading, Wolfson Laboratory, AMS Building,  
Whiteknights, P.O. Box 228, Reading RG6 2AJ, U.K.

## consulting editor

David Edelson

1107 Kenilworth Road, Tallahassee, FL 32312-3854, U.S.A.

## editorial board

Dr P. H. Andersen  
Novo Nordisk A/S  
CNS Division  
Novo Alle, DK-2880 Bagsvaerd  
DENMARK

Dr Jan Andzelm  
BIOSYM/Molecular Simulations Inc.  
9685 Seranton Road, San Diego  
CA 92121-3752, U.S.A.

Professor A. M. Bond  
Department of Chemistry  
Monash University, Clayton, Vic. 3169  
AUSTRALIA

Dr J-M. Claverie  
Laboratoire "Information Génétique &  
Structurale"  
IBSM-CNRS 31 Chemin Joseph Aliguier  
F-13402 Marseille Cedex 20  
FRANCE

Dr J. Fickett  
SmithKline Beecham Pharmaceuticals  
Mail Code UW 2230  
709 Swedeland Road, King of Prussia  
PA 19406, U.S.A.

Dr Johann Gasteiger  
Computer-Chemie-Centrum  
Universitaet Erlangen  
91052 Erlangen, GERMANY

Professor Michael Grubskov  
San Diego Supercomputer Center  
P.O. Box 85608, San Diego  
CA 92186-9784, U.S.A.

Professor Peter A. Kollman  
Department of Pharmaceutical Chemistry  
University of California, San Francisco  
CA 94143, U.S.A.

Dr A. K. Konopka  
BioLingua Research  
10143 Ridgeline Drive, Gaithersburg,  
MD 20879, U.S.A.

Professor James A. McCammon  
Department of Chemistry & Biochemistry  
University of California at San Diego  
La Jolla, CA 92093-0365, U.S.A.

Professor Afonso Nino  
E.U. Informatica de Ciudad Real  
Universidad de Castilla-la Mancha  
Ronda de Calatrava No. 5  
13071 Ciudad Real, SPAIN

Professor Iwao Ohmine  
Chemistry Department,  
Faculty of Science, Nagoya University,  
Furo-cho, Chikusa, Nagoya, JAPAN

Dr Arthur Olson  
Research Institute of the Scripps Clinic  
10666 North Torrey Pines Road  
La Jolla, CA 92037, U.S.A.

Professor Isaiah Shavitt  
Department of Chemistry  
Ohio State University, Columbus  
OH 43210, U.S.A.

Professor T. Shida  
517-95 Iwakura Nagatanicho  
Sakyo-ku  
Kyoto 606-0026, JAPAN

Professor Andrzej Sokalski  
Molecular Modelling Laboratory  
Technical University of Wroclaw  
Wyspianskiego 27  
50-370 Wroclaw, POLAND

Dr W. R. Taylor  
Laboratory for Mathematical Biology  
National Institute for Medical Research  
The Ridgeway, Mill Hill  
London NW7 1AA, ENGLAND

Professor Nenad Trinajstic  
Institut Rugjer Boskovic  
P.O. Box 1016, 41001 Zagreb  
CROATIA

Professor Charles L. Wilkins  
Dep. of Chemistry and Biochemistry  
University of Arkansas, Fayetteville  
AR 72701, U.S.A.

## Publishing and Advertising Offices

Elsevier Science Ireland Ltd., Elsevier House, Brookvale Plaza, East Park, Shannon, Co. Clare, Ireland. Tel.: (+ 353) 61 709600, Fax: (+ 353) 61 709100/709101. Authors wishing to use e-mail to contact the Elsevier Science Production Editor for *Computers and Chemistry* may use the following address: chemistry.production@elsevier.co.uk.

It is recommended that the journal name is put in the subject field of the message's "envelope" information.

**Publication information:** Computers & Chemistry (ISSN 0097-8485). For 2001, volume 25 is scheduled for publication. Subscription prices are available upon request from the Publisher or from the Regional Sales Office nearest you or from this journal's website (<http://www.elsevier.nl/locate/compchem>). Further information is available on this journal and other Elsevier Science products through Elsevier's website: (<http://www.elsevier.nl>). Subscriptions are accepted on a prepaid basis only and are entered on a calendar year basis. Issues are sent by standard mail (surface within Europe, air delivery outside Europe). Priority rates are available upon request. Claims for missing issues should be made within six months of the date of dispatch.

**Orders, claims, and product enquiries** please contact the Customer Support Department at the Regional Sales Office nearest you: **New York:** Elsevier Science, PO Box 945, New York, NY 10159-0945, USA; phone: (+ 1) (212) 633 3730 [toll free number for North American customers: 1-888-4ES-INFO (437-4636)]; fax: (+ 1) (212) 633 3680 e-mail: usinfo-f@elsevier.com **Amsterdam:** Elsevier Science, PO Box 211, 1000 AE Amsterdam, The Netherlands; phone: (+ 31) 20 4853757; fax: (+ 31) 20 4853432; e-mail: nlinfo-f@elsevier.nl **Tokyo:** Elsevier Science, 9-15 Higashi-Azabu 1-chome, Minato-ku, Tokyo 106-0044, Japan; phone: (+ 81) (3) 5561 5033; fax: (+ 81) (3) 5561 5047; e-mail: info@elsevier.co.jp **Singapore:** Elsevier Science, No. 1 Temasek Avenue, #17-01 Millenia Tower, Singapore 039192; phone: (+ 65) 434 3727; fax: (+ 65) 337 2230; e-mail: asiainfo@elsevier.com.sg **Rio de Janeiro:** Elsevier Science, Rua Sete de Setembro 111/16 Andar, 20050-002 Centro, Rio de Janeiro - RJ, Brazil; phone: (+ 55) (21) 509 5340; fax: (+ 55) (21) 507 1991; e-mail: elsevier@campus.com.br [Note (Latin America): for orders, claims and help desk information, please contact the Regional Sales Office in New York as listed above]

Copyright © 2001 Elsevier Science Ltd

Periodicals postage is paid at Rahway NJ. Computers & Chemistry (ISSN 0097-8485) is published bimonthly in January, March, May, July, September and November by Elsevier Science Ltd., The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, UK. The US subscription price is \$1269.00 per year.

**POSTMASTER:** Send address corrections to: Computers & Chemistry, Elsevier Science, Customer Support Department, PO Box 945, New York, NY 10159-0945.

Distributed in the USA by Mercury Airfreight International, 365 Blair Road, Avenel, NJ 07001.

### NUMBER 1

Open Problems of Computational Molecular Biology (6),  
edited by Andrzej K. Konopka

- |  |     |  |
|--|-----|--|
| <b>A.K. Konopka</b>                                    | 1   | Preface  |
| <b>W.R. Taylor, G. Sælensminde and I. Eidhammer</b>    | 3   | Multiple protein sequence alignment using double-dynamic programming   |
| <b>T. Cardozo, S. Batalov and R. Abagyan</b>           | 13  | Estimating local backbone structural deviation in homology models  |
| <b>W.J. Wilbur and A.F. Neuwald</b>                    | 33  | A theory of information with special application to search problems  |
| <b>L. Allison, L. Stern, T. Edgoose and T.I. Dix</b>   | 43  | Sequence complexity for biological sequence analysis   |
| <b>M. Klaerr-Blanchard, H. Chiapello and E. Coward</b> | 57  | Detecting localized repeats in genomic sequences: a new strategy and its application to <i>Bacillus subtilis</i> and <i>Arabidopsis thaliana</i> sequences             |
| <b>H. Wan and J.C. Wootton</b>                         | 71  | A global compositional complexity measure for biological sequences: AT-rich and GC-rich genomes encode less complex proteins   |
| <b>C. Kappen</b>                                       | 95  | The homeodomain: an ancient evolutionary motif in animals and plants   |
| <b>H.P. Yockey</b>                                     | 105 | Origin of life on earth and Shannon's theory of communication  |
| <br><b>Conference reports</b>                          |     |  |
| <b>S. Wheelan and W. Makalowski</b>                    | 125 | Genome research: the second decade. A report on the XI Cold Spring Harbor Laboratory Meeting On Genome Mapping and Sequencing, May 13–17, 1998, Cold Spring Harbor, NY |
| <b>L. Allison</b>                                      | 129 | Intelligent systems in molecular biology (ISMB98), 27 June–1 July, 1998, Montreal  |
| <b>D.D. Pollock and J. Heringa</b>                     | 133 | RECOMB98. Computational molecular biology: pre- and post-genomics, March 22–25, 1998, New York   |

**Book reviews****F. Lisacek**

- 135 *Algorithms on Strings, Trees and Sequences*, Dan Gusfield

**G. Grant**

- 139 *Bioinformatics — The Machine Learning Approach*

**NUMBER 2****S. Okada and K. Okada**

- 143 Detailed differential coefficients of anomalous dispersion terms to derivatives in least-squares refinement for X-ray crystallography

**Y. Almirantis**

- 159 Pattern formation in a Turing's type model with minimal reactional complexity

**A. Yan, G. Jiao, Z. Hu and B.T. Fan**

- 171 Use of artificial neural networks to predict the gas chromatographic retention index data of alkylbenzenes on carbowax-20M

**S.C. Basak, B.D. Gute, B. Lučić,  
S. Nikolić and N. Trinajstić**

- 181 A comparative QSAR study of benzamidines complement-inhibitory activity and benzene derivatives acute toxicity

**E. Estrada**

- 193 A computer-based approach to describe the  $^{13}\text{C}$  NMR chemical shifts of alkanes by the generalized spectral moments of iterated line graphs

**J. Szczygiel**

- 203 Diffusion and kinetics of reaction over bidispersive reforming catalyst

**S. Klavžar, P. Žigert and I. Gutman**

- 229 An algorithm for the calculation of the hyper-Wiener index of benzenoid hydrocarbons

**J.-P. Grillasca, R. Planells,  
D. Aubert and F. Antonini**

- 235 SPAC: identification of polypeptides using their amino-acid composition

**Book review**

- 239

**NUMBERS 3,4****NEW TRENDS IN COMPUTATIONAL METHODS**

**A Collection of Papers from the Fifth Conference on Computers in Chemistry  
and the Workshop on New Trends in Computational Methods for Large  
Molecular Systems, Szklarska Poręba, Poland, 1–6 July 1999**

**W. Andrzej Sokalski and M. Krauss** 241 Preface

**MOLECULAR SYSTEMS****R.F. Nalewajski****J. Korchowiec****S. Zelek, J. Wasilewski and  
J. Heldt****S.E. Worthington and M. Krauss****G. Náray-Szabó****M.S. Lee and M. Head-Gordon****A. Abkowicz-Bieńko,  
M. Biczysko and Z. Latajka****G. Alagona, C. Ghio and A. Agresti****J. Lundell, M. Pettersson and  
M. Räsänen****R. Osman, M. Fuxreiter and N. Luo****A. Famulari, F. Moroni, M. Sironi  
and M. Raimondi****N. Kurita and K. Kobayashi****B.W. Domagalska, K.A. Wilk,  
H. Szymusiak and R. Zieliński**

- 243 Coupling relations between molecular electronic and geometrical degrees of freedom in density functional theory and charge sensitivity analysis
- 259 Recognition of the electrophilic and nucleophilic centers in molecules via the radical charge transfer Fukui function
- 263 Density functional study of the  $S_0$  ( $\tilde{X}^1A_g$ ) and  $T_1$  ( $\tilde{\alpha}^3A_u$ ) states of the glyoxal molecule
- 275 Effective fragment potentials and the enzyme active site
- 287 Chemical fragmentation in quantum mechanical methods
- 295 Absolute and relative energies from polarized atomic orbital self-consistent field calculations and a second order correction. Convergence with size and composition of the secondary basis
- 303 Solvent effect on hydrogen bonded ammonia–hydrogen halide complexes: continuum medium versus cluster models
- 311 A theoretical study on reaction pathways to carbanions
- 325 Computer experiments on xenon-containing molecules
- 331 Specificity of damage recognition and catalysis of DNA repair
- 341 Interaction of Ia and IIa group cations with the guanine site in cytosine-guanine nucleic acid base pair: an ab initio Hartree Fock study in the absence of basis set superposition error
- 351 Density functional MO calculation for stacked DNA base-pairs with backbones
- 359 New conjugated polyenes with 1,3-dialkyl-2-thiobarbituric acid moiety as materials for nonlinear optics: theoretical calculations, synthesis and spectral properties

- H. Szymusiak, R. Zieliński,  
B.W. Domagalska and K.A. Wilk**
- E. Wozniak, S. Ołdziej and  
J. Ciarkowski**
- H. Xu and J.S.J. Van Deventer**
- A. Góra, E. Broziałwik and  
M. Najbar**
- E. Broziałwik and T. Borowski**
- S. Trohalaki, E. Gifford and  
R. Pachter**
- M. Skowronek, I. Roterman,  
L. Konieczny, B. Stopa,  
J. Rybarska, B. Piekarzka,  
A. Górecki and M. Król**
- K. Kulińska, T. Kuliński,  
A. Lyubartsev, A. Laaksonen  
and R.W. Adamiak**
- M. Zapałowski and  
W.M. Bartczak**
- W.M. Bartczak and K. Pernal**
- B. Kuchta and B.M. Ladanyi**
- S. Crivelli, R. Byrd, E. Eskow,  
R. Schnabe, R. Yu, T.M. Philip  
and T. Head-Gordon**
- K.A. Olszewski, L. Yan, D. Edwards  
and T. Yeh**
- K. Pawłowski, L. Rychlewski,  
J.C. Reed and A. Godzik**
- 369 Electronic structure and nonlinear optical properties of model push-pull polyenes with modified indanone groups: a theoretical investigation
- 381 Molecular modeling of the catalytic domain of serine/threonine phosphatase-1 with the  $Zn^{2+}$  and  $Mn^{2+}$  di-nuclear ion centers in the active site
- 391 Ab initio calculations on the five-membered aluminosilicate framework rings model: implications for dissolution in alkaline solutions
- 405 Quantum chemical modeling (DFT) of active species on the V-W-O catalyst surface in various redox conditions
- 411 Characteristics of the ligand-binding site interaction for a series of arecoline-derived muscarinic agonists: a quantum chemical study
- 421 Improved QSARs for predictive toxicology of halogenated hydrocarbons
- 429 The conformational characteristics of Congo red, Evans blue and Trypan blue
- 451 Spatial distribution functions as a tool in the analysis of ribonucleic acids hydration — molecular dynamics studies
- 459 Structural and dynamical properties of concentrated aqueous NaOH solutions: a computer simulation study
- 469 Potential traps for an excess electron in liquid water. Geometry, energy distributions and lifetime
- 483 Monte Carlo simulations of  $I_2^- (CO_2)_{16}$  and  $I_2^- (N_2O)_{16}$  clusters. Minimum energy structures and solvation energy
- 489 A global optimization strategy for predicting  $\alpha$ -helical protein tertiary structure
- 499 From fold recognition to homology modeling: an analysis of protein modeling challenges at different levels of prediction complexity
- 511 From fold to function predictions: an apoptosis regulator protein BID

**REMAINING SESSIONS OF THE FIFTH CONFERENCE ON COMPUTERS IN CHEMISTRY****K. Kurzak**

- 519 LFP: A PC-program for ligand-field analysis of 3d<sup>n</sup> ions in O<sub>h</sub> and lower symmetries

**K.T. Wojciechowski and  
A. Małecki**

- 527 SYMTERM — program for modelling chemical processes in non-isothermal conditions

**A.A.C.C. Pais, J.L.G.C. Pereira and  
J.S. Redinha**

- 533 Nonlinear regression in parameter estimation from polarographic signals

**NUMBER 5****V. Warth, F. Battin-Leclerc,  
R. Fournet, P.A. Glaude,  
G.M. Côme and G. Scacchi**

- 541 Computer based generation of reaction mechanisms for gas-phase oxidation

**V. Petrov, L. Antonov, H. Ehara  
and N. Harada**

- 561 Step by step filter based program for calculations of highly informative derivative curves

**E.A. Castro, M. Tueros and  
A.A. Toropov**

- 571 Maximum topological distances based indices as molecular descriptors for QSPR: 2 — Application to aromatic hydrocarbons

**G. Avdelas, A. Konguetsof and  
T.E. Simos**

- 577 A generalization of Numerov's method for the numerical solution of the Schrödinger equation in two dimensions

**A.J. Gorączko and J.A. Szymura**

- 585 Dehydrogenation processes and molecular clusters in mass spectra of organometallic and coordination compounds

**J.M. Jeżowski, H.K. Shethna,  
R.J. Bochenek and  
F.J.L. Castillo**

- 595 On extensions of approaches for heat recovery calculations in integrated chemical process systems

**E. Wolska, C.R.A. Catlow, P.  
Piszora and S.M. Woodley**

- 603 Structure refinement of quaternary spinel oxides — experiments and modelling

**P. Piszora, C.R.A. Catlow,  
S.M. Woodley and E. Wolska**

- 609 Relationship of crystal structure to interionic interactions in the lithium-manganese spinel oxides

**J. Polanski and B. Walczak**

- 615 The comparative molecular surface analysis (COMSA): a novel tool for molecular design

**NUMBER 6**

- P. Qian** 627 On-line computer aided multi-component analysis using organic elemental analyzer
- S. Magni and G. Sello** 635 Reaction centre accessibility. I. Calculation of reaction centre congestion and influence of structure flexibility
- S. Magni and G. Sello** 645 Reaction centre accessibility. II. Role of reaction centre congestion in the calculation of reaction centre accessibility
- J. Leluk** 659 Regularities in mutational variability in selected protein families and the Markovian model of amino acid replacement
- D. Britz and J. Strutwolf** 673 High-order spatial discretisations in electrochemical digital simulation. 1. Combination with the BDF algorithm
- C. Opitz** 685 Overlap integrals with *g*-orbitals
- J. Gabarro-Arpa and R. Revilla** 693 Clustering of a molecular dynamics trajectory with a Hamming distance
- R.V. Parbhane, S.S. Tambe and B.D. Kulkarni** 699 ANN modeling of DNA sequences: new strategies using DNA shape code

#### **Preparation of Manuscripts**

*General.* Only original papers will be considered. The receipt of a paper by the Editor is held to imply that submission for publication has been approved by all of the authors, that it has not previously been published in any language, that it is not under consideration for publication elsewhere, and that if accepted for publication it will not be published elsewhere without the written consent of the publisher. The official language of the journal is English. Papers will be reviewed for proper English construction. Authors for whom English is a foreign language are recommended to have the manuscript thoroughly checked and corrected before submission.

*Organisation.* Manuscripts should be typed double-spaced on one side of the page only, and with wide margins. The first page should contain the title, a list of authors' names, the affiliations and address(es) of the authors when the work was performed (new addresses should be given in a footnote), a short running title (less than 65 characters), a list of up to six keywords, and the telephone number, fax number and e-mail address of the corresponding author, who should be indicated by an asterisk.

The second page should contain a 50-250 word abstract of the paper.

The remainder of the paper should be organised into sections; for example, Introduction, Materials and Methods (including any mathematical principles and algorithms if appropriate), Results and Discussion. The final two sections may be combined. An Acknowledgement should be given if deemed necessary.

*Keywords.* Authors must provide up to six keywords at the end of the abstract to be used for future indexing and electronic searching.

*Computer programs.* Program descriptions, where necessary, should take the form of flowcharts, with short listings of pertinent sections of code. Program listings should be limited in length to that necessary to define the algorithm; since available space precludes the reproduction of lengthy program listings, code that can be reproduced by a skilled programmer should be omitted. However, authors do have an implied obligation to make the detailed code available to interested readers on request, either directly or through organisations such as the Quantum Chemistry Program Exchange.

*Mathematical Expressions.* All mathematical symbols may be either hand-written or typewritten but no ambiguities should arise. Explain the meaning of all symbols in the text where they first occur. Greek letters and unusual symbols should be identified in the margin. Distinction should be made between capital and lower case letters; between the letter O and zero; between the letter I, the number one and prime; between K and kappa. A vector will be printed boldface and to indicate this the letter should be underscored with a single wavy line. The numbers identifying mathematical expression should be placed in parentheses.

*References.* References should be identified in the text as follows: one author (Zupan, 1989); two authors (Zupan and Gasteiger, 1991); three or more authors (Sun et al., 1994). If there is more than one publication in a single year under the same authorship use Lucasius et al. (1991a, b) etc. The references at the end of the manuscript should then be arranged as follows:

Sun, L.-X., Xie, Y.-L., Song, X.-H., Wang, J.-H., Yu, R.-Q., 1994. Computers and Chemistry 18, 103.

Zupan, J., 1989. Algorithms for Chemists. Wiley, Chichester.

Zupan, J., Gasteiger, J., 1991. Analytica Chimica Acta 248, 1.

Titles of journals may be given in full or in the abbreviated forms conforming to those adopted by the Chemical Abstracts Service (Bibliographic Guide for Editors and Authors, The American Chemical Society, Washington, DC, 1974). Serial publications such as Advances in Enzyme Regulation should be listed in the same form as journals. References to chapters in monographs are listed as follows:

Fisman, W. H., 1973. Platinum catalysts. In: Advances in Platinum Catalysis, Smith, J. (Ed.), Vol. 2. Pergamon Press, Oxford, p. 293.

*Figures and Tables.* These should be so constructed as to be intelligible without reference to the text; every figure, table and column being provided with both heading and legend. Each figure should be clearly marked on the reverse with the name(s) of the author(s) and the figure number. Captions should be typed on a separate sheet.

Figures should be submitted in a form suitable for direct reproduction. They should be provided as carefully prepared line drawings about twice the final size on plain white drawing paper. Laser printer output at 300 dots per inch for a two-to-one reduction on good quality paper is acceptable. Authors should take particular care to ensure that lettering on a figure will remain legible after reduction. Tables and program listings may be reproduced photographically directly from the authors' copy to avoid the introduction of errors. The same quality standards set for figures apply here. Character size should not be less than 10pt (0.14 in. or 3.5 mm).

**Colour figures.** One page of colour illustrations can be published free of charge in each article, provided colour is deemed scientifically necessary by the reviewers and by the editor. The cost of additional colour figures will be charged to the author. Each additional page will cost US\$ 800. Colour illustrations should be submitted as original colour photographs, transparencies, or 35 mm slides. Polaroid colour prints are not suitable. Please submit colour photographs and transparencies close to the size expected in publication.

#### **Submission**

This may be by mail, fax, or, in certain circumstances, by e-mail.

**Mail.** Manuscripts should be submitted in triplicate to the Editor at the following address:

Professor M. James C. Crabbe  
Wolfson Laboratory, AMS Building, University of Reading, Whiteknights, P.O. Box 228, Reading,  
Berkshire, RG6 2AJ, U.K. Tel: + 44 (0) 118 9318894

**Fax.** If authors feel that manuscripts that can be reviewed from a faxed copy (i.e. usually without half-tone figures), then a single copy of the manuscript may be transmitted to the editor by fax, to the following number: Fax: + 44 118 9318894

Acknowledgement of receipt and the review decision will be returned by fax to the corresponding author.

**Authors submitting by fax should also send a clean copy of the text and original artwork by surface mail.**

**E-mail.** For letters, and manuscripts that can be transmitted and reviewed from an e-mail copy (figures may be a problem), then a single copy may be transmitted to the Editor by e-mail to the following address:

*E-mail:* m.j.c.crabbe@reading.ac.uk

Authors must include their normal mail address, fax, telephone numbers and e-mail address. Acknowledgement of receipt and the review decision will be returned by e-mail to the corresponding author where possible. **Authors submitting by e-mail should also send a clean top copy of the text and original artwork by surface mail.**

**Disk.** Authors should send the final accepted version of their article on a computer disk (3.5 or 5.25 HD/DD) along with the final hardcopy typescript to the editorial office. Please observe the following criteria:

- (a) Do not send a disk until your paper has been accepted.
- (b) Make sure that the disk and hard copy match exactly.
- (c) Specify what software was used, including which release, e.g. Wordperfect 5.0.
- (d) Specify what computer was used (either IBM compatible PC or Apple Macintosh).
- (e) Include the text file and separate table and illustration files, if available.
- (f) The text file should be single spaced. Place two returns after elements such as title, headings, paragraphs, figure and table call-outs. Otherwise, within a text block, avoid using returns at the end of each line. All textual elements should begin flush left (no paragraph indents).
- (g) Follow the general Instructions for Authors on all points not covered by item (f).
- (h) Keep a back-up disk for reference and safety.

#### **Refereeing of Papers**

All papers are subject to anonymous review by experts; authors will be provided with referees' comments. Authors may suggest potential reviewers (complete with addresses, fax and telephone numbers) for their papers, but the Editor is under no obligation to follow such suggestions. Authors may also suggest names of those they wish to be excluded from the review process. To expedite reviewing, it would be helpful if authors enclose two copies of their recent relevant papers, or papers in press.

#### **Copyright Guidelines**

Authors are requested to read the note on copyright published on p. ii of each issue. A Transfer of Copyright form will be sent out with the proofs of a paper. All authors must sign the 'Transfer of Copyright' agreement before the article can be published. This transfer agreement enables Elsevier Science Ltd to protect the copyrighted material for the authors, but does not relinquish the author's proprietary rights. The copyright transfer covers the exclusive rights to reproduce and distribute the article, including reprints, photographic reproductions, microform or any other reproductions of similar nature and translations, and includes the right to adapt the article for use in conjunction with computer systems and programs, including reproduction or publication in machine-readable form and incorporation in retrieval systems. Authors are responsible for obtaining from the copyright holder permission to reproduce any figures for which copyright exists.

#### **Correspondence**

All correspondence with the Editors or Publisher should contain full reference to the paper concerned, i.e. the names of all the authors, the full title, the date of submission and the article nos. assigned by the Editor and Publisher (if known). Once the article has been accepted for publication all further correspondence should be sent to the Shannon office of Elsevier and not to the Editors. Address correspondence to The Issue Manager, Computers and Chemistry, Elsevier Science Ireland Ltd., Elsevier House, Brookvale Plaza, East Park, Shannon, County Clare, Ireland; Fax: + 353 61 709111.

#### **Proofs and Reprints**

**Proofs.** Page proofs will be sent to the corresponding author for checking. Corrections to proofs must be restricted to printer's errors. Any substantial alterations other than these may be charged to the author.

**Reprints.** Authors are provided with 50 reprints free of charge. Further supplies may be ordered on the reprint order form which accompanies the proofs. Copies of the particular issue in which the article appears may also be ordered on this form, at a generous discount.
